FRESENIUS KABI

Irrigation Sets

Fresenius Kabi offers a range of sterile irrigation sets to complement our **solu***flex*® Irrigation Bag portfolio and to support health care providers in delivering a high standard of care.

Fresenius Kabi irrigation sets are **not made with DEHP** and available in both 1-spike and 2-spike configurations, each designed to offer distinct features depending on the specific set. These features may include:

- Bag spike with drip chamber
- Roller clamps
- Urology connector
- Backcheck valve
- Pinch clamps
- Luer lock connection
- Drain hose with Luer lock
- Silicone para tube (allows connection between the urology connector and other components)

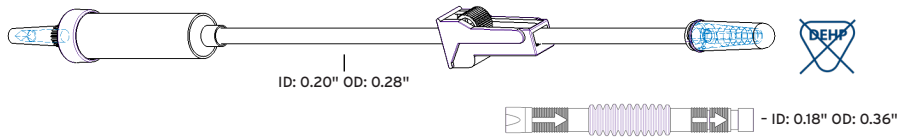

Not made with DEHP | All sets contain PVC | All sets are not made with natural rubber latex

Single Lead Urology Sets

TRANSFER SET 1 D

Drip chamber with spike, roller clamp, urology connector, and optional para tube.

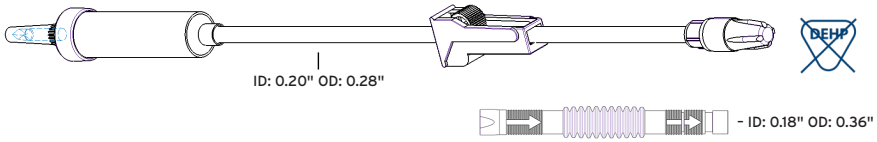

Product Code	GTIN	Length (inch)	Shelf Life (months)	Units / case
